

PRODUCT LINE REPORT

0.1 CUBIC FOOT HORIZONTAL MIXER

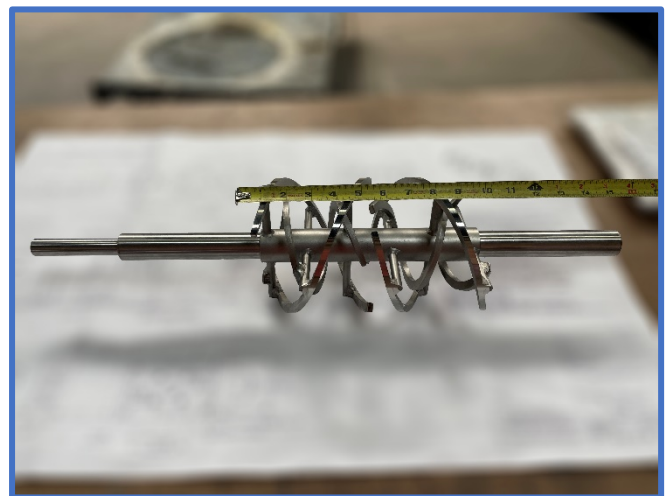

**ADVANCED
TECHNOLOGY
PROVEN DESIGN**

Fully Assembled 0.1 Cu. Ft. Horizontal Mixer

- a. The mixer is equipped with removable end assemblies to gain agitator access for easy cleaning when the need arises.
- b. The body of the mixer is equipped with a cooling/heating jacket for temperature control of the material being mixed.

A research university recently had a requirement for a custom laboratory ribbon mixer. Young Industries manufactured a 304 stainless steel horizontal ribbon mixer with a mixing capacity of 0.1 cubic foot. The mixer is designed to blend a variety of chemicals for research and development purposes. This mixer is designed to operate 24/7 and includes several custom features.

Double Ribbon Agitator

- c. Double ribbon multi-pitch agitator capable of mixing multiple materials homogeneously in applications where small percentages of materials are used.

This mixer was designed and manufactured with input from the customer to meet their exact application needs.

Mixer Body Next to a Standard 12 oz. Can
